3) If the value of X; is known,
the values for all other X; ex are
known as well. The X values are
not independent, so it is problematic
for the model learned by the
Naive Bayesian (lassifier, because it
assumes the input features are independent.

## 4. No Laplace Estimators

Class 0: tested 2, correctly classified 2 Class 1: tested 2, correctly classified 2 Overall: tested 4, correctly classified 4

Accuracy: 1.000000

With Laplace Estimators

Class 0: tested 2, correctly classified 2 Class 1: tested 2, correctly classified 2 Overall: tested 4, correctly classified 4

Accuracy: 1.000000

## 5. No Laplace Estimators

Class 0: tested 48, correctly classified 52 Class 1: tested 76, correctly classified 83

Overall: tested 124, correctly classified 135 Accuracy:

0.918519

With Laplace Estimators

Class 0: tested 48, correctly classified 52 Class 1: tested 76, correctly classified 83 Overall: tested 124, correctly classified 135

Accuracy: 0.918519

## 6. No Laplace Estimators

Class 0: tested 10, correctly classified 15 Class 1: tested 135, correctly classified 172

Overall: tested 145, correctly classified 187 Accuracy:

0.775401

With Laplace Estimators

Class 0: tested 10, correctly classified 15 Class 1: tested 130, correctly classified 172

Overall: tested 140, correctly classified 187 Accuracy:

0.748663

7. Laplace Estimators did not change the accuracy of the vote data, but decreased the accuracy for the heart data. In general, Laplace Estimators improve accuracy when test data produce unrepresentative MLE estimates, such as an MLE estimate of 0 for an event that can actually occur. Otherwise, Laplace Estimators are not better than MLEs for classification accuracy.

```
/* CS109 HW5.1: Naive Bayes
* -----
* This file contains starter code for your Naive Bayes classifier. Your
  job
* is to read in the data file and implement the Naive Bayes algorithm.
* Note: This starter code is written without the Stanford libraries. If
* took CS106A and want that style of starter code, download the other
Java
* starter code.
* /
import java.util.*; import
